subtle - Bug #186

DESTDIR support for the build/install

03/11/2011 08:42 PM - Vincent Batts

Status:	Fixed		**Start date:**	03/11/2011
Priority:	Urgent		**Due date:**	
Assignee:	Christoph Kappel		**% Done:**	100%
Category:	Suggestion		**Estimated time:**	0.00 hour
Target version:				

Description

for ease of packaging, a DESTDIR is nice.
the attached patch allows the current functionality, as well as the typical gnu make style make ; make install DESTDIR=/tmp/foo
so no one could,
$> DESTDIR=/tmp/foo rake install

History

#1 - 03/12/2011 11:31 AM - Christoph Kappel

- Status changed from Unconfirmed to Fixed

- % Done changed from 0 to 100

Applied in changeset 3363c94d3620.

#2 - 03/12/2011 11:33 AM - Christoph Kappel

Hum, instead of patching the rakefile you could rather use the way that was intended for packaging: rake install destdir=/tmp/foo rake install

Anyway, I will just add it since it is probably easier for people familiar with just make, thanks.

Btw: For which dist are you packaging subtle? Is it already on the install wiki page?

For Slackware Linux, currently in my personal package repo (https://github.com/vbatts/SlackBuilds), but once the new Slackware release 13.37 is out, then it will get published to http://slackbuilds.org/

#4 - 03/12/2011 04:18 PM - Christoph Kappel

Ah, if you don't mind, can you add install instructions for slackware here: install I don't have a clue how to use slackware at all. ;)
