**Description**

Styles like occupied and focus are logically just sub-styles of the `:views` style and should therefore use a special syntax. Also the `:urgent` style should be available for view only.

Additionally the sub-styles can be used for styling of sublets independently as sub-styles of the `:sublets` style and replace the `foreground`, `background`, `text_fg` and `icon_fg` config values. When `icon_fg` is gone another style value for icons is required.

Appropriate [Subtext](#) methods (`#style=`) to set styles could replace the `#foreground=` and `#background=` methods of `Subtext::Sublet` and `Sublet::Sublet`.
