| When trying to run subtle with a config that does not define a style for :unoccupied, subtle displays a stacktrace. |                  |                        |            |
| When running subtle with debug information, it shows this instead:  |                  |                        |            |
| subtle: src/subtle/style.c:189: subStyleMerge: Assertion `s1 && s2' failed.   |                  |                        |            |
