<b>Category:</b>	Feature	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	Xi		
<b>Description</b>			
Currently, <a href="#">windows</a> cannot be moved across the boundaries of the <a href="#">screen</a> and in rare cases this is hindering/annoying. A better solution would be to allow snapping but also allow to move the <a href="#">window</a> further when the user insists.
