

subtle - Bug #304

Strange spacing for sublets

09/22/2012 12:24 AM - René Neumann

Status:	Fixed	Start date:	09/22/2012
Priority:	Urgent	Due date:	
Assignee:	Christoph Kappel	% Done:	0%
Category:	Bugfix	Estimated time:	0.00 hour
Target version:	Omicron		

Description

It seems like the spacing of sublets is sometimes calculated in a strange way. For example the clock is not shown completely (see http://data.necoro.eu/subtle_spacing.png). On different resolutions I have to experiment with different min_width values to get it working -- but this is not the way it should be, as the panel is empty...

Configuration attached.

Btw - the clock is also cut off, if the tray is populated...

History

#1 - 09/22/2012 12:17 PM - Christoph Kappel

Tried this specific font in any other window? [subtle](#) uses the font metrics to define width and it works with almost all fonts. It just fails when the font specs are kind of broken.

#2 - 09/25/2012 06:13 PM - René Neumann

It seems like the problem is triggered when a sublet (here 'clock') uses a font different from the rest.

For example when I defined the font to be "Arial-8" for style :all and then explicitly set the font for the clock to be "Arial Black-8", parts of the clock vanished.

(This is just an example and not my real usage. But I expect the Arial family to be non-broken and they differ enough to show the error.)

#3 - 12/30/2017 06:11 PM - Christoph Kappel

- *Target version set to Omicron*

#4 - 12/30/2017 06:12 PM - Christoph Kappel

- *Category set to Bugfix*

- *Status changed from Unconfirmed to Fixed*

- *Assignee set to Non member users*

Well, I cannot see any x-offset problems here in the current version. There was still a y-offset problem, when the fonts of panel items differs.
