Target version:			
Description			
Hi,			
just found a possible bug after playing with Subtlex::View instances.			
<pre>irb> Subtlex::View.current => terms irb> Subtlex::View.list[0] => terms irb> Subtlex::View.current.id => 0 irb> Subtlex::View.list[0].id => 0 irb> Subtlex::View.list[0].tags => [default, terms] irb> Subtlex::View.current.tags TypeError: no implicit conversion from nil to integer from (irb):142:in `tags'     from (irb):142     from /usr/bin/irb:12:in `<main>'</pre>			
So it seems Subtlex::View.current method fails to update tags variable for the returning object.			

History

- Status changed from Unconfirmed to Rejected

Working properly on current version.
